Personal Information

Marital status: single

Nationality: Honduran

Age: 20 years old

Vehicle: No

EXPERIENCE

Web developer – PixelPay (Currently working in)

- PixelPay is a growing Honduran startup that facilitates the expansion to businesses in an ecommerce universe, provides tools to process electronic payments and this requires the development of efficient and fast solutions in a web environment, so my role is to develop high level projects with/for banks and merchants, maintaining and solving bugs of the company's platform as well.

Telephone Agent - Allied Global

- In Courtesy Call, the main goal of the area was to make calls in support of different charitable causes to collect monetary donations, for example Breast Cancer Outreach Foundation and the veterans.

Telephone Agent - KM2 Solutions

- I had the pleasure of working at Western Dental Care, a campaign in which I had the good fortune to speak and put into practice my knowledge of English scheduling appointments with dentists and provide an excellent quality of service, for patients who needs to be seen with the dentists.

EDUCATION AND PROFESSIONAL OBJETIVE

Education

- **Currently:** Student of Informatics Engineering with 80% university degree completed.
- Secondary Education: Bachelor of Science and Humanities, Institute “Departamental La Independencia”.(Santa Bárbara)

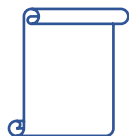

Professional Objective

- I Want to Get The Opportunity to be part and help with my skills and knowledge to complete and accomplish every objective of this company and continue with my professional development
- I want to be part of a teamwork where I can apply my knowledge and experience, I can have the opportunity to grow professionally.

SKILLS

- High level web apps development with php for backend (Laravel Framework) and MySQL databases.
- Web apps and websites Frontend development with HTML, CSS and JS.
- Experience with user interface design and user experience (UI and UX).
- Desktop applications development (client-server) with programming like C#, Java and databases like MySQL and SQL Server.
- Basic knowledge in Anular/Ionic, Node.js (backend) and non relational databases with MongoDB.
- Technical knowledge of administration, marketing and customer service.
